

## U.S. Oil and Gas Production: Safety and Support for American Families

### Injury Rate per 100 Workers

**“Energy industries report declining injury rates.”**

December 5, 2014

#### U.S. Bureau of Labor Statistics

**“The number of fatal work injury cases in oil and gas extraction industries were over 20 percent lower in 2013...”**

September 2014

#### Shale Development Supports High Wages and Worker Benefits

**“Additionally, average wages of oil and natural gas production jobs were \$108,000 in 2013, more than twice the average**

**wage for all private sector industries.** Since 2009, average wages from oil and natural gas production jobs have increased by 12%, compared with a 10% increase for all private sector industries.”

November 2014

#### UA Local 396

**“We have experienced a staggering uptick in man hours out of this union hall. Over the past four years, 600,000 man hours, per year, have been attributed to shale gas related work.”**

—Butch Taylor, Business Manager, UA Local 396

#### Laborers' Int'l Union of North America (LIUNA)

**“These are not just work hours, they're not just statistics, and they're not just wells and pipelines... For many, it has been a path out of poverty.”**

July 2014
